Abstract (en)

[origin: EP1069542A2] A motor vehicle (K) has a transmitter-receiver (1) for a mobile telephone system connected to a converter (2) linked to two data buses (3,4). A combined display (5) has an integrated control device and two other control devices (6,7) for air conditioning and an anti-lock braking system. A memory (9) has an EEPROM for required data. A control station (S) remote from the vehicle can instruct the vehicle to read in data to its control devices.
