Abstract (en)

[origin: WO9951514A1] The invention relates to a gripper (3) in a star conveyor (1) for containers (2) comprising means (17, 18, 8) for adjusting the gripper (3) and the adaptability to containers (2) of different diameter, which are formed so as to co-operate with means (9, 10, 11) for moving the gripper so that the adjusting means provide, depending on their position, a plurality of basic configurations for the gripper (3), each suitable for particular diameters of the containers (2) to be processed, while the moving means perform, for each of said basic configurations, opening and closing of the gripper (3) so as to grip or release individual containers (2).
