Abstract (en)
[origin: WO9953158A1] Mounting apparatus for gates used in association with scaffolding comprises means for cooperating with a known scaffold fixing system, a hinge and means for attachment to a gate (7). The apparatus may be adapted for in either the Cuplok or Kwikstage systems. A method for reclaiming damaged scaffolding comprises the steps of truncating the tubular component (1) to produce a relatively long portion and an end portion (4). The end portion (4) may be used as part of mounting apparatus in association with scaffolding.
