Abstract (en)
[origin: DE19913712A1] The electric switch has a switch operating element (3), displaced from a rest position into 2 successive operating positions, for respective switch functions, with the movement of the switch operating element from the rest position blocked by a first locking device (5) and its movement from the first switch position blocked by a second locking device (6), both locking devices controlled by an operating element (7) with 3 switch positions.
