Abstract (en)
[origin: EP1070584A1] The offset printer has a first form printing mechanism (1,2) and a further printing mechanism, with form cylinders. The form cylinder (3,10) in the first form printing mechanism rotates in a direction opposite to that of the further printing mechanism. The fixture for the start of printing in the first form printing mechanism corresponds to the printing end in the further printing mechanism, and the fixture for the printing-end in the first form printing corresponds to the printing start in the further printing mechanism.
