Abstract (en)

[origin: EP1070798A2] The partition system uses a vertically adjustable under structure (2) with first holders arranged vertically in a pattern, and a stand (3) with second holders (8) arranged vertically in the same pattern and designed to engage with the first. An adapter (4) guided in the upper end of the stand can be brought into engagement with the ceiling (6) or ceiling holder (5). The under structure can have a floor stand and a height adjuster connected to same through a height adjustment device.
