Abstract (en)
[origin: EP1070806A1] The platform (14) has at least one support (18) which can be set up spaced from a building or at least one support element (18) with which the platform element can be fixed on a support (20) set up spaced from the building. A foldaway platform covering (22) freely projects out in the direction of the building in the assembled state. The platform covering can be designed to fold up in several sections. A removable protection device (24) such as a grid can extend up from the support element to secure the area towards the back of the building.
