Abstract (en)

[origin: EP1070812A1] Lock has case (1), security block (3) passing through case and protection device (5) against attempted break in. Protection device has shield (9), fixed against one of case side faces, provided with orifice (10) giving passage for part of security block. It also has spring (20) housed in groove (21) in security block and in part of reinforcement (22) in shield face which is applied against case.
