Abstract (en)

[origin: EP1070855A1] The actuator has an extruded tubular body. The tube has a sliding guide sector (14) extending in the longitudinal direction. The locking device (16, 17) is in the form of a slide which can be moved along the guide sector between a position for the insertion or removal of the fluid line fitting (12, 13) and a position in which the fitting is locked in place.
