Abstract (en)

[origin: EP1070911A2] The headlamp has a reflector (2), a light source (3), a lens (5) in front of the reflector in the beam direction and a stop arrangement (20) between the lens and reflector with at least one height adjustable stop (6,7). The stop(s) is associated with a rotatable cam (14,15) and is held on the sliding surface of the cam, which is driven by at least one motor (17) to set the stop in defined positions.
