Abstract (en)
[origin: EP1072309A2] The cartridge has a mixing channel which is separable from the main cartridge, as well as a releasably attached insert. The cartridge has tube-like openings which lead into corresponding openings in the insert. The tubular openings are formed by a tube (2) having a separating wall (3) with two semicircular openings (7,8). The separating wall is attached to the insert via a tongue and groove connection.
