Abstract (en)

[origin: DE19936906C1] The assembly for cleaning small containers, used for the protection and movement of machine parts etc., has a conveyor system with spray, washing and drying stations. The first station (5) has a feed point (4) for the soiled containers (1), and a vertical tunnel (3) with a continuous vertical conveyor (6) to carry them through heating and spray units (7,8) to spray, heat and soak the containers (1). At the second station (15), an inverter (16) moves the containers (1) to be cleaned inside and on the outside by brush sets (17,18). At the third station (25), inverters (26,27) move the containers (1) for rinsing and drying. Transfer units (14,34) move the containers (1) between the three stations (5,15,25).
