Abstract (en)

[origin: EP1072369A1] The phase setting device set the phases dependent on the folding mode. The perforating tools (35.1, 36.1, 37.1, 38.1) act with the perforating battens (35.2, 36.2, 37.2, 38.2) to perforate the web (1) of material. The battens are on at least one perforating bridge (27, 27.1; 28, 28.1) which can be adjusted relative to the perforation cylinder surfaces.
