Abstract (en)

[origin: EP1072370A1] An even layer (10) of material (6) is carried on a flat conveyor (2) to a treatment chamber (11), where at least one additive (23) is added evenly either before it enters the chamber or in the chamber itself. The material and additive are mixed and crushed by a rotor (15) with blades (17) turning in the opposite direction to that (F) of the conveyor. The treated material (26) is recovered
