Abstract (en)

[origin: EP1072535A1] The packaging system consists of using two layers (1, 14) of a film material and two layers (5, 13) of a moisture absorbing material to wrap a rectangular cheese (12) or portion of cheese. The first layer is pressed into a rectangular cavity (10) with the layer of moisture absorbing material (5) in its base, and the cheese is inserted into the cavity. The second layer (14) of film material, with the second absorbent layer (13) attached to its underside, is then sealed to the first layer over the cavity, leaving the projecting edges of the first layer to be folded over in flaps (17) to complete the package.
