Abstract (en)

[origin: WO9955358A1] Methods to inhibit hot flashes or gynaecomastia in a subject are provided. In the methods of the invention, an LHRH antagonist is administered to a subject in need of treatment for hot flashes or gynaecomastia such that hot flashes or gynaecomastia are inhibited in the subject. In a particularly preferred embodiment, the invention provides a method for inhibiting menopause-related hot flashes in which an LHRH antagonist is administered to a subject in need of treatment for menopause-related hot flashes such that the hot flashes are inhibited in the subject.
