Abstract (en)

[origin: WO9954103A1] A method of producing a through-coloured wooden element in which the element is pressed isostatically in a first step, at a pressure greater than 800 bar, preferably greater than 1000 bar, whereafter the pressure is removed and the element is then placed in a liquid bath that contains a dissolved colorant in a second step. The invention also relates to a through-coloured wooden element.
