Abstract (en)

[origin: WO0043609A1] The invention relates to a method of production and to a building component (1) for exterior and interior walls. Said building component consists of at least one panel element (5) and a fiber layer and one support grid (7) and a plaster support (3) for the outer wall. During production of the panel element (5) a support grid (7) is inserted into the outer surface (2) of the fiber layer (4) and is fixated. Said support grid is at least partially embedded in the surface (2) and is glued together with the fibers (10) of the fiber layer (4).
