Abstract (en)

[origin: WO9955993A1] A hinge component blank made from a rolled or drawn profiled material strip which is divided up by means of a steel separating cut along a transversal boundary line (I) and split up into individual hinge component blanks once separation has occurred along a separating line (II). The shaped material strip has a T or Y shaped cross-section and is divided up into individual hinge component blanks by means of a steel separating cut along the boundary lines (I) and the separating lines (II) and in the vicinity of the hinge head (7 or 8) by means of a separating saw cut along a separating line (III).
