Abstract (en)  
[origin: WO9960516A1] A device for recording information has a sensor (8) for recording a primary image of the information, a display (25) for showing a secondary image which constitutes at least part of the primary image, and control means (20, 27), with the aid of which a user can define on which sub-image of the primary image an operation is to be performed. Methods of recording information are also disclosed.
