Abstract (en)

[origin: WO9944394A1] The invention relates to a device for preparing food portions (4) comprising a microwave compartment (1) in which a portion (4) can be heated. At least one part of a boundary (2) of the microwave compartment (1) is configured as a cooking surface (2'). An extremely quick preparation can be carried out by means of heating and cooking when the portion is placed on the cooking surface (2') in the microwave oven. The dimensions of the device can be adjusted to extremely small sizes such that it adapts to the size of possible portions. The method for preparing food portions (4) provides that during heating by means of microwaves, two opposite outer surfaces of the portion (4) are in contact with cooking surfaces (2').
