Abstract (en)

A protective wristwatch case for attaching a standard wristwatch to the outside of the glove or jacket sleeve for viewing while skiing or snowboarding. The glove or jacket sleeve includes an outer shell. The wristwatch case includes a pad attached to or formed by the outer shell, a hollow transparent enclosure defining a protective space, and a fastener for removably securing the hollow transparent enclosure to the pad. Straps secure the wristwatch band to the glove/jacket. The enclosure includes movable pins that selectively protrude into the protective space to allow the wearer to operate the watch control buttons. <IMAGE>
