Abstract (en)  
[origin: EP1074499A2] The suction unit includes a number of motor driven axial fans (30) located next to the sheet fall region (34) with its suction side facing the sheet fall region. A number of the fans are located close to a side of the sheet fall region which lies upstream in relation to the processing direction. This number can vary depending on the processed sheets (3) with regard to their position. An Independent claim is included for a printing machine incorporating the proposed sheet deliverer.
