Abstract (en)  
[origin: WO0109444A2] New structural modality for multifunctional environments, considering a building (1) on which pavements a variety of multifunctional units (2, 3, 4, 5) are arranged, each one consisting of a residential space (10) and a commercial space (20). The access to each one of such spaces (10, 20) is done independently and through elevators (12, 22), stairs (13, 23) and halls (8B, 6R), with no direct communication between them. The invention also considers that switching between the commercial (20) and residential (10) spaces of a single multifunctional unit (2, 3, 4, 5) can be done through an internal door (not shown).
