Abstract (en)

Integrated programmer-timer (10) for domestic appliances, such as in particular washing machines, drying machines or dish washers, comprising a supporting frame (26) of typical components for the timing and conditioning function, said timer being able to be connected to a plurality of components which are not typical of the timing function, the frame (26) including means (13) on which at least one of said functional components (12) not typical of the timing function is able to be integrally mounted, before the timer is assembled onto the appliance. <IMAGE>
