Abstract (en)
[origin: WO9956888A1] A portable adhesive applicator apparatus for articles to which adhesive is to be applied, wherein the articles may be parquet panels, ceramic tiles and the like, including an element (13) having a least one elongate contact face for articles to which an adhesive is to be applied, an adhesive applicator (21) detachably secured to the said element (13) or pivotally secured against said element (13) so as to be pivotal from a position of use to a position of transport and having at least one nozzle (5) for the application of adhesive to said article and at least one storage site for the articles to which adhesive is to be applied. The contact face of the element (13) defines a first storage site, and a second storage site is defined by said bars (15) pivotally secured to the element (13). Said element (13) and the bars (15) are provided with wheels (10). On the contact face behind the stack of articles is arranged a pusher means (25) which pushes the lowermost article in the stack under the adhesive applicator nozzles (5).
