Abstract (en)  
[origin: EP0953516A1] The present invention is directed to a box (10) for containing tissues, comprising at least one opening (11) located on at least one side of the box, under which a dispensing insert (14) is positioned so that it covers at least partially said opening of the box, said dispensing insert further comprising a cut-out portion (15) or a dispensing slot with at least two portions (16) that contact the boarder of the box opening, said box being characterized in that the dispensing insert is made out of material with high resilience, so that after being bent it is capable of coming back to its initial shape on its own, without losing its elastic properties. <IMAGE>
