Abstract (en)

[origin: WO9950380A1] This invention relates to an acidic detergent composition comprising an acidic protease which retains proteolytic activity in the presence of an inhibitor selected from the group consisting of pepstatin, Pefabloc, PMSF, or EDTA and at least one nonionic surfactant. The composition further provides methods for cleaning or washing a hard surface or laundry comprising contacting said hard surface or laundry with the composition according to invention dissolved in an aqueous solution in an amount sufficient for providing a cleaning effect.
