Abstract (en)

[origin: EP1075879A1] The device has a suction unit in a casing (1) having a suction surface (3) and a slightly larger cover (2) to form peripheral air spaces (5,7,8) in front of the suction surface, whose opening area is smaller than that of the suction surface. A least one additional suction surface (30,40) has a slightly larger cover (32,42) forming additional air spaces, forming a smaller opening area than that of the additional suction surfaces.
