Abstract (en)
The method and appliance (2) for discharging waste paper screens involve pulling away the screen in the form of a belt at a pre-set speed. The screen is then coiled spirally into an axially continuing endless cylindrical tube (4) . Tubular sections are then cut (5) off periodically from the tube and taken for re-processing or disposal. The pulling-off appliance forms part of the coiling appliance.(3)

Abstract (de)
Das erfindungsgemäße Verfahren zum Abführen von Makulargittern bei Druckmaschinen besteht im wesentlichen darin, die bandförmig anfallenden Gitter spiralig zu einem rohrförmigen Körper zu wickeln, der seinerseits auf einfachste Weise weiterverarbeitet oder entsorgt werden kann. Dazu wird eine Spiralwickelvorrichtung (3) direkt oberhalb der Druckmaschine (1) angeordnet. <IMAGE>
