Abstract (en)
[origin: EP1075944A1] The printing unit has several cylinders (6-9) each with its own drive motor. The cylinders are adjustable in relation to each other by means of a carriage-guide. The machine framework has a support wall positioned to one side near one end side (11) of the printing cylinders. The support wall (1) has two walls (15) at right angles to a plane on the end surfaces of the cylinders. The two facing walls have guide elements for carriages (2-5) adjustably positioned between the walls. Each carriage has a firmly inserted threaded nut into which fits a driven threaded spindle (18-21).
