Abstract (en)
[origin: EP1076088A1] This invention relates to a process for cleaning textiles, which comprises applying a composition comprising a low molecular weight linear siloxane represented by the formula: $\text{CH}_3((\text{CH}_3)_2\text{SiO})_n\text{Si}(\text{CH}_3)_2\text{CH}_3$ wherein n is an integer from 1 to 7, and a cationic surfactant to stained textiles and heating it in the presence of an inorganic base compound at a temperature below which the textiles are deteriorated.
