Abstract (en)  
[origin: EP1076129A2] A wool treatment agent is disclosed herein which is characterized by the fact that said agent is an aqueous emulsion composition consisting of (A) an amino-group containing organopolysiloxane, (B) a nonionic emulsifying agent with an HLB of less than 15, (C) a nonionic emulsifying agent with an HLB of 15 or greater, and (D) water. The present invention introduces a wool treatment agent that shows superior stability against ionic substances, and is useful as an anti-shrinkage finishing agent.
