Abstract (en)

[origin: EP1076143A1] The locking assembly, especially for domestic appliances, has a mounting section (8), a locking bolt (10) and a spring elastic bending link (12) between them. A push button (18) gives a manual movement of the locking bolt (10) against the spring force for release against the locking direction (14) of bolt movement. The mounting (8), bolt (10) and connecting link are in a one-piece body of the same material, such as of plastics or sheet plate.
