Abstract (en)
  [origin: EP1076347A2] The device has upper (3) and lower (1) housing parts, a circuit board (11) for accommodating switching elements, one or two batteries/accumulators (9a, 9b) for standby operation of drive functions and./or the hand controller current supply and a cable (13) and/or infrared transmitter for connecting the controller to the drive. The circuit board and/or housing upper part can be attached to the lower housing part in at least two different installed positions.
