Abstract (en)
[origin: WO9955058A1] A method of information search comprising an externally maintained database (40, 42, 48) or a personal database (10) of telephone numbers to provide a search criteria and match the search criteria against the two databases to generate a single list of search results. The externally maintained database (40, 42, 48) and the personal database (10) may each be stored locally and/or at a remote location. Preferably, the remote location is at a telephone company (48).
