Abstract (en)
[origin: EP1077120A2] Edge protector for handsaws, comprising a tooth-protecting part with unsymmetrical U-section and with the same curvature as the toothed edge of the saw blade, where the base part (16) is extended in the first end corresponding to the front end of the saw and provided with a suspension part (18) and a peg (19) with a head (22) which can be inserted through a hole (14) in the saw blade at least in a predetermined relative position of the saw and the edge protector, and where the tooth-protecting part near the other end is provided with a closure (21) which can prevent relative motion between the saw blade and the edge protector when the toothed edge of the saw blade is entered into the U-section.
