Abstract (en)

[origin: EP1077186A1] The packaging film for food containers has a support layer (24) and a weldable layer (26) connected by a layer (28) of permanent adhesive. In corresponding areas (22A) of the layers, the weldable layer has a line of weakness defining an area for connective welding of the layers. The line of weakness aids tearing of the package along them.
