Abstract (en)
[origin: EP1077300A1] The lock has a closing cylinder for operating the lock bolt . The closing cylinder is in a cylinder housing (1) to which is fixed a protective cover (5) at least partly enclosing the housing except for the key-hole. The protective cover fits into a holder-collar (2) on the cylinder housing by means of at least one and preferably four diametrically opposite recesses (7)
