Abstract (en)
[origin: DE19821175A1] The upper covering layer (2) has a nominal break point (4) at which a flexurally elastic surface structure (5) at the ball of the foot is positioned. The surface structure extends across the width (7) of the nominal break point, and is stuck by adhesive to the upper covering layer. The wooden sheet with the top covering layer have several first (3) and second (8) openings. A surrounding band (11) overlaps the edge of the nominal break point.
