Abstract (en)
[origin: WO9958037A1] The invention concerns a device for positioning a cooking utensil, for example a grill (1), consisting of at least one arm, for example two arms (2 to 4 and 5 to 7) whereof one end of said arms is fixed to the cooking utensil (1) and the other to a horizontal rotary shaft; said shaft (8), produced for example in one single section, is supported by means such as bearing surfaces (9 to 10 and 12 to 13) located, for example, on supports such as (25) and (26), and is provided with rotating and locking means such as an adjusting lever (19 to 21) comprising locking means such as a clamp screw (18) provided with a handle (17); the positioning device is advantageously completed by means stabilising the cooking utensil such as at least a link rod (23) linking the cooking utensil to an element fixed relative to the horizontal rotary shaft (8) axis, such as the cooking appliance frame (27).
