Abstract (en)

[origin: WO9959632A1] The present invention is directed to methods for treating asthmatic, allergic, and Th2-mediated inflammation conditions by administering a product having TNF-RII(p75) agonist properties to a human or an animal. The use of products having TNF-RII(p75) agonist properties for the preparation of pharmaceutical compositions for treating bronchial asthma, allergic and Th2-mediated inflammation conditions in humans or animals is also provided by the invention, as well as a method for screening products having TNF-RII(p75) agonist properties comprising monitoring the inhibition of pulmonary inflammation occurring in humans or animals having pulmonary inflammation.
