Abstract (en)

[origin: FR2778641A1] The screw cap consists of a top (2) and a skirt (4) with an internal thread (6) and a circular rib (8) forming a groove (10), while teeth (12) and/or notches (14) on the skirt edge prevent it from rotating while being removed from its mold. The internal thread rib (6) is designed so that it comes close to the rib (8) forming the groove (10) but does not make contact with it. In addition, the height (h1) of the groove rib (8) is about one millimeter less than the height (h2) of the thread rib (6).
