Abstract (en)

[origin: FR2778644A1] The container comprises a drinking vessel (1) such as a goblet or flute, made from glass, plastic or metal, sealed by a cap (4) that is retained by a wire cover (5) which is located in an annular groove (6) around the periphery of the vessel. The glass is of twin-walled construction with the cavity (10) filled with an active thermostatic substance. The cap comprises a layer of a polymer or rubber sealing material (8) inside a metal plate (9).
