Abstract (en)

[origin: FR2778643A1] The security device (14) for a cap with a top (10) and skirt (12) fixed to the neck (2) of a bottle or similar e.g. by matching threads consists of a security ring (18) designed to engage with a stop (4) on the neck, a band (20) which surrounds the skirt and is connected to the security ring by a rupture line (28), and an axial stop extending across the top of the cap, connected to the band and equipped with a tongue (36) which is lifted to remove the band.
