Abstract (en)  
[origin: WO9958523A1] The present invention contemplates 1,5-diaryl-substituted pyrazole compounds which correspond in structure to Formula (I), or a pharmaceutically-acceptable salt thereof: wherein A is =N- or =CH-; and which inter alia, inhibit the activity of p38 MAP kinase. Also contemplated by the invention are processes for the preparation of the contemplated compounds and for the use of a contemplated compound in treating a mammalian host having a p38 kinase- or TNF-mediated disease.
