Abstract (en)

[origin: WO9958782A1] A panel assembly comprises a pair of panels, such as glazing panels (16), mounted in frames (70A, 70B) whose adjacent edges overlap opposite longitudinal edges of a support member (12) and are held in place by a plurality of retaining members (88) mounted on the frames. The retaining members (88) are snap-fitted to the support member (12) such that the panel (16) is securely mounted on the support member (12) without experiencing any strain.
