Abstract (en)
[origin: WO9959121A1] The invention relates to a presentation device (1) comprising a base (5) and bars (3) which can be connected or are connected to one another and which are provided for a flexible stand (2). Said stand can be connected or connects to the base (5) via a plug connection. The presentation device also comprises crossbars (9, 10) provided as a holding device for a poster, a film or other such presentation media (6) for the connection thereof to the base (5) and to the stand (2). For a quick and easy set-up or dismantling, the base (5) is configured with four elongated folding feet (14 to 17). Said feet are connected to an elongated transversal support (11) and can swivel from a folded resting position parallel to the transversal support (11) to a functional position in an at least essentially perpendicular manner relative to the transversal support (11), and can swivel back again.
