Abstract (en)
The adapter element has one side for coupling to a door fitting (12, 13) and another side with a bearing surface (14) for the rotary knob (16, 18) of a door lock system. An insertion section (22, 24) for a standard lock cylinder can be inserted into an opening in the door fitting and is shaped so that its end view corresp. to that of a standard lock cylinder and/or the plug-in section can fit accurately into the opening. An Independent claim is also included for an application of an adapter element to an esp. electromechanical lock system for doors.

Abstract (de)
Die Erfindung betrifft ein Adapterelement für Türen, dessen eine Seite zur Koppelung mit einem Türbeschlag ausgebildet ist und dessen andere Seite eine Lagerfläche für einen Drehknopf eines Tür-Schließsystems aufweist. <IMAGE>
