Abstract (en)
A reflector assembly (34,36,38;200) for reflecting light from a bulb (12;212) in a luminaire (10;210) is designed to be mounted within the body (14;214) of the luminaire between the bulb and the top of the luminaire. The reflector assembly includes a reflector support unit (40,41;224) which is configured for mounting within the luminaire body (14;214) such that it can be adjusted upwardly and downwardly within the luminaire body. The reflector assembly (34,36,38;200) also includes at least one reflector (34,36,38;232-242) mounted to the support unit. The reflector may be removably and pivotably mounted and may be adjusted to reflect light in a desired manner. The reflector assembly (34,36,38;200) may also include an adjustment mechanism (42,74;244-254,256-262) which allows the coordinated adjustment of several reflectors. <IMAGE>
